## Sem VIII - BBLB4034 - Patent Drafting and Specification writing

*Your answer should be specific to the question asked*

*Draw neat labeled diagrams wherever necessary*

1. Does Indian Patent act grant protection worldwide? K2 CO1 (4)
2. As a lawyer, what questions would you ask your client to check the patentability of their invention? K3 CO2 (5)
- 3) Suma is a homemaker in rural Karnataka. In 2008, she evolved a new fish feed formula. She has been selling the product in open market to people and communities around her. In 2010, she approaches you asking if she can patent the formula to derive more economic gains out of it. How would you advice her? K3 CO2 (7)

**OR**

- A psychiatrist of Mumbai develops a music therapy for his schizophrenic patients which has tremendous impact on them and helps them to get rid of many of symptoms of schizophrenia. The doctor attended one awareness program for patent filing and being motivated approached you for advice. As a lawyer, what would you suggest them? K3 CO2 (7)
4. State is the meaning of the term 'state of art' as mentioned in Section 2(l) of the Patent Act. How is it different from the field of invention? K2 CO1 (7)
  - 5) A prior art reference discloses a chair with a seat and four legs, which may be made of wood or metal. Inventor A invents a rocking chair with a seat and four legs made of wood, and the inventor's pending claims refer only to a seat and four legs but make no mention of the rocker attachments for the chair. Does the prior art reference anticipate this invention? K4 CO3 (7)

**OR**

1. This invention relates to apparatus and method for collecting liquids and, in particular, to liquid collection apparatus and methods of the type employed in printing devices to collect unused ink. Traditional liquid collection devices collect liquid (in the case of printing ink) for reuse in the process in which the liquid is being employed. Such liquid collection devices do, however, have problems associated with them. One significant problem is that air can be collected with the liquid and mixed with it by the collection device. K4 CO3 (7)

The air can contain contaminants, which are drawn into the liquid, reducing the quality of the recycled liquid. A further problem, particular to printing inks, is that mixing of the inks with air can lead to ink solvent evaporation into the air, increasing the viscosity of the ink. The present invention is directed towards the provision of a liquid collection apparatus which collects liquid without collecting air trapped therein. According to the present invention there is provided a liquid collection apparatus comprising: means for collecting liquid; liquid conduit means for transferring liquid from the liquid collection means; porous liquid absorption means positioned between the liquid collection means and the liquid conduit; and pump means for pumping liquid from the liquid conduit, the pump means generating a pressure in liquid in the conduit that is sufficient to draw liquid through liquid collection means but is insufficient to draw a gas/liquid surface through the liquid absorption means.

After reading the details, draft

1. An appropriate title
2. Field of invention
